The Jukebox

New Release Notification

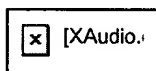

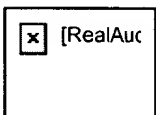

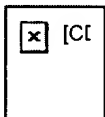

Enter E-Mail

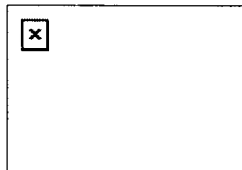

MusicMatch Jukebox is the world's first integrated digital music management software for the home - combining CD ripping, MP3 and Real Audio encoding, music from the internet, a sophisticated music database, and a really cool player. [Download MusicMatch Jukebox](#) now and turn your PC into a powerful new component of your home stereo system!

Version 2.50 Now Available!! Now supports MP3-to-WAV conversion for easy CD publishing. Still comes with free lifetime upgrades!

Click here to read [MP3.com's insightful analysis](#) of how MusicMatch Jukebox compares to the new "CD Streamer" solution by SuperPlanet.

Record

The easiest way to create MP3's! Just put a music CD in your CD-ROM drive, select the tracks you want to record, and click "start". Tracks are digitally extracted and MP3-encoded at speeds up to 5x faster than normal play time - without ever making an intermediate WAV file. MusicMatch Jukebox uses the state-of-the-art Xing MPEG encoding technology, previously available only in commercial configurations for multimedia professionals, and supports the Intel MMX commands set for lightning fast MP3 encoding.

Add

Download MP3-compressed, CD-quality tracks over the internet, and add them into your digital music database. Get great music from forward-looking artists and labels who understand the value of the internet - as a music distribution channel and as a way of exposing their music to millions of new people every day. Check out the downloadable music catalogs at [MusicMatch](#) and

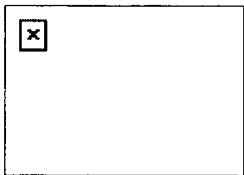

[MP3.com](http://www.mp3.com).

☐ Organize

The MusicMatch Jukebox database system makes it easy to find the songs you're looking for in your digital music collection. Sort your tracks by artist, title or other database field, and simply click on a title to add it into your playlist. Want some help? Just click a few buttons to describe the type of music you want to hear, and the automatic DJ will create the perfect playlist for your mood.

☐ Play

Play your customized playlists from your PC, either through your PC sound system, or through your stereo amplifier with MusicMatch Connects. View cover art, lyrics, track notes and artists' bios for each track while it's playing.

Download MusicMatch Jukebox at no charge! The player and jukebox portions of the program are fully functional, and but the standard version can only record 5 tracks from your CD collection.

Once you've downloaded MusicMatch Jukebox, register the program by Internet, phone, or mail for only \$29.99, and you'll be able to record all the tracks you want. Comes with free lifetime upgrades!

☐ Free Download

System Requirements: Windows 95/98, 16MB RAM 30MB available disk space. Pentium 166MHZ or greater recommended. NT support is not currently available.
